

Universal Design Principles

Understanding and Applying Universal Design Principles to Buildings and Facilities
By Lucas Wheeler from Access Institute (IATA)

Supported By

Australian
Institute of
Architects

Hobart - 12.30-2.30pm Wed 1 November
Launceston - 1pm-3pm Thurs 2 November

Universal Design Principles

What is Universal Design and how does it relate to buildings and facilities? How is it different from minimum, legislated access requirements? Why and how does it assist with future proofing our assets and make them more usable for everyone.

This seminar will provide an overview of Universal Design and the positive impact it can have when incorporated into the design and development of buildings and facilities. The key principles of Universal Design will be explored and examples of how these are applied in buildings and facilities and how they differ from minimum, legislative access requirements will be discussed.

Hobart: 12:30-2pm Wednesday 1 November
Where: Centre for Architecture, 1/19a Hunter St
[BOOK NOW](#)
