

Product Specification

This seminar recaps an architect's duty of care, including an overview of some of the investigations into combustible cladding and asbestos cement, and makes suggestions for the all-important task of managing substitutions during construction phase.

Supported By

Australian
Institute of
Architects

Hobart - Monday 27 November 6pm-7.30pm
Launceston - Tuesday 28 November 1pm-2.30pm

Product Specification

Deficiencies or alleged deficiencies in product specification are a common contributor to claims against architects, and recent years have provided some sobering illustrations of the worst consequences that can result from materials selection.

This seminar recaps an architect's duty of care, including an overview of some of the investigations into combustible cladding and asbestos cement, and makes suggestions for the all-important task of managing substitutions during construction phase.
