Passive House Masterclass - Window and Doors

The Windows Master Class series has been presented to the Australian Passive House Association in Melbourne and Sydney. The presentation will provide an overview of Passive House design principles, and specifically for windows and doors within the thermal envelope in the context of the Tasmanian Climate. Stuart McKenzie-Hall has been designing buildings based on Passive House Principles since 2012 and relevant case studies will be examined. Using building science with practical examples the need for high performance windows and doors will be discussed in detail and the benefits demonstrated.

Presented by Stuart McKenzie-Hall

Location

This class is worth 2 formal CPD points.
