NSS4: Biophilic design – An introduction for designers

This seminar will explore 'what is' and 'what is not' biophilic design to assist in removing ambiguity in this area and provide tangible principles, and also explore case studies that have successfully integrated aspects of biophilic design to assist readers in visualising and recognising truly biophilic environments. This course is worth 2 Formal CPD Points..

CPD Points and Competency:

2.0 formal CPD points: Design

(Tasmania only)
