Since its creation 15 years ago, the Green Star rating system has been a consistent leader in the sustainability space. This has been achieved by continuously pushing the boundaries, exploring new opportunities to improve the quality of the Australian built environment and by evolving the Green Star rating tools in line with international standards.

Location

Presented by Jamie Wallis is Senior Manager – Market Engagement at the Green Building Council of Australia.

Jamie will give an overview of the GBCA, the Green Star rating system and its tools, discuss how the leaders in the sector are approaching sustainable development, and what the future holds for Green Star. The GBCA is about to embark on an ambitious journey to reshape the Green Star rating system and bring you the next evolution of the tools. Green Star Future Focus will see the rating system evolve and adapt to ensure the sustainable built environment delivers what it needs to, whilst also responding to global megatrends and emerging challenges.

Livestream (Online) - Wed 24 Oct: 1pm - 2pm [BOOK NOW](#)
