**Professional Indemnity Insurance Requirements – refer Section 18 of Code of Practice**

An architect must have insurance cover to meet all obligations, and in all circumstances they are required to have a minimum of \$ 1 million cover.

When you decide to cease practice in Australia, you must take out appropriate run-off cover for matters that would otherwise be uncovered arising from previous practice as a registered architect.

### Reason for application

- I am a Non-practising Architect who has permanently retired and am not providing any architectural services either paid or unpaid and I do not have any uncovered matters from my previous practice as a registered architect.
- I will be living and only providing architectural services overseas during the reporting period and I do not have any uncovered matters from my previous practice as a registered architect in Australia.
- Other circumstances, please provide details
